Organization Statement

Be Above provides a safe, healthy learning environment that stimulates curiosity and joy in learning. Be Above believes that children's play provides the foundation for academic learning ("Children learn best through play"). Play is the "work" of young children. The philosophy that guides the program is that young children learn best by doing and that parents are children's primary teachers.

"We" believe that parents and teachers must work together in order to support the development of young children.

"We" believe that learning is not simply repeating what someone else says; it requires active thinking and experimenting to find out how things work and to learn firsthand about the world we live in.

To provide children with these experiences we provide the necessary enrichment materials and environment to foster their learning in school and at home.
